DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

2. Claims 1-14 are allowed.
3. The following is an examiner's statement of reasons for allowance: the prior art neither anticipates nor makes obvious a torque detector having a detection element that detects an analog torque signal corresponding to a steering torque, a converter to convert the analog signal to a digital signal, and a hysteresis processor connected to the converter specifically so that a value of the digital torque signal is included in a predetermined range. The above recitation, combined with the rest of the structure in the independent claim, clearly defines over the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Oshita et al. (U.S. Patent No. 4,875,541), Miyazaki et al. (U.S. Patent No. 4,834,201), Takahashi et al. (U.S. Patent No. 5,182,711), Mitsuzuka et al. (U.S. Patent No. 5,616,849), Kagawa et al. (U.S. Patent No. 5,978,721), and Gandarillas (U.S. Patent No. 6,516,508 B1)
